

ATM WARNING

Skimmers attached to ATM's

The use of skimmers on ATM machines is another way crooks have figured out how to steal your information without your knowledge. I have attached some pictures of ATM and the types of skimmers crooks are attaching to the machines. Keep in mind that there is camera used in this process to steal your information. I say all that to get you to look at the machine carefully before you use it and take notice of any pamphlet box that may be attached to the machine which is in close proximity to the key pad.

If you notice anything unusual on any ATM machine notify the bank ASAP and Metro Nashville Police at 862-8600.

Clear Plastic Skimmer

With Skimmer

Without Skimmer

The PIN reading camera being installed on the ATM is housed in an innocent looking leaflet enclosure.

The camera shown installed and ready to capture PINs by looking down on the keypad as you enter your PIN.
